No.	About *	Time/Date	Location	Details	Action Taken / Findings
23_01	N	24/10/23 8:40 pm	Buttai	Complaint via 'Hotline'. Complaint about noise from open cut on 24/10/23.	Environmental Advisor rang complainant on 25/10/23. Complainant said that noise sounded like rocks being dropped into empty dump truck. Explained that around time of complaint coarse rejects from CHPP was being transferred from a temporary stockpile to disposal in void. The temporary stockpile is located in a high position. Combined with an easterly wind, this was the likely noise source. The noise model indicated noise enhancement to the east of the workings which does not indicate an easterly wind. Work ceased at 9:45 pm.
